

Vegetable Schedule

Please remember these dates are estimates. Actual dates will vary due to temperature and rainfall.

Explanation of terms

Semi continuous: This type of vegetable will be available from the 'Expected Harvest' date forward on a semi continuous basis. Every other week or so.

Second Harvest: This type of crop will be planted and harvested multiple times during the season.

End of season: This type of crop is harvested after the first frost, during the last weeks of the season.
